

Pro-Vee Floor Groover

The Pro-Vee Groover is specially designed to quickly groove dairy cattle floors during placement in one pass

- ◆ Simple installation fits standard 8" float
- ◆ Unique V shape permits formation of a consistent groove with no rocks or burrs protruding after the float passes
- ◆ Cast aluminum construction keeps weight to a minimum and provides a similar finish as a standard float
- ◆ Easily removed in minutes to allow the float to be used for non-grooved surfacing

The Pro-Vee Groover is built for one purpose...
to efficiently provide uniform, nonslip floor grooves
for cattle walkways

*“The Best Finish...
Everytime.”*
